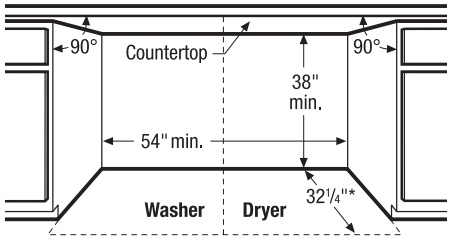
15" Drawer Pedestal Installation

Elevates dryer height to 53". For detailed pedestal installation, refer to instructions included with pedestal or on web. **Note:** Pedestal Installation requires modified utility hookup locations. For details, refer to Product Installation Guide on web.

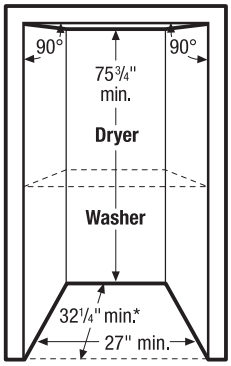
Built-In Installations

For built-in installations, 3/4" steam hose clearance required at back of dryer, NO minimum clearance required around sides of units. For closet installation, allow 1" clearance between fronts of units and door. Location of plumbing, exhaust and utility hookups MUST be considered in built-in installations. For additional installation details, refer to Product Installation Guides on web.



Side-by-Side Units in Under-Counter Installation
Requires custom-built countertop and/or cabinetry.

* To achieve minimal depth dimensions or clearances, dryer MUST be vented straight back or with quick-turn 90° elbow.



Stacked Units in Recessed or Closet Installation
For detailed stacked installation, refer to instructions included with Stacking Kit or on web. **Note:** Stacked installation requires modified utility hookup locations for dryer. For details, refer to Product Installation Guide on web.
